

CREATE A
SPECIAL PLACE

AND CREATE
HARMONY

“What is your best childhood memory of playing?”

What is your best childhood memory of playing?

This memory probably brings a smile to your face... Not just because of the happy memory, but also because of the care free feeling that characterizes young children when they can be themselves in a positive environment.

Being a child means laughing, playing, living in a never ending fantasy, having self-confidence and respect, being creative, honest and above all unbiased. At this young age, millions of connections are made in the brain that will define the rest of children's lives.

It is my mission to create a positive environment for children all over the world. Accompany us and experience the atmosphere that we create with our play concepts.

Our play concepts can be seen everywhere...

Retail

When kids can play in a special play area, parents and customers can peacefully browse and make their purchases. For the children, playing also creates beautiful memories. And those pay off, because they will forever remember a great time in your store. The earlier you provide a fun experience, the more their love for your brand will grow!

Hospitality

The fun of going out with the family largely depends on how well the children can enjoy themselves. So, they often decide where the family will go! We believe that the positive effects of investing in play value are not to be underestimated. When the children feel at home and have plenty of entertainment, their parents can easily order another drink or bite to eat.

Public areas

A beautiful, uniquely designed play corner helps to create a calm atmosphere, which allows your staff to better assist your visitors. While the kids can play in a specially designated play area, your guests can get the help they need or wait for their appointment in peace. Make your public space a pleasant place to come back to!

Healthcare

In order to create a nice atmosphere in your waiting room or medical office, a play corner is the perfect way to quickly make children feel at ease and give them some distraction while they sit and wait. Being able to have fun not only helps them relax before their appointment, but will also make their next visit a little less intimidating.

Daycare

Parents want to leave their children in the safe hands of the daycare, knowing that their kids are being well cared for and that they can have plenty of fun without having to miss their parents too much. Our play concepts are not only safe and endlessly fun for all ages, but also offer educative games that help develop their cognitive and social skills.

Leisure

When everyone can relax and have a fun time, from children to grownups, there will be a truly family-friendly atmosphere at your sports facility, museum, cinema, amusement park or wherever else families come to have fun. When all visitors feel truly at home with plenty of entertainment, they'll surely want to come back another time!

Interior designers

Including play value in the design process ensures a perfect integration in the design concept. Our IKC Design Team even has ready-to-use models for you to incorporate in your project. In the end, the client will enjoy the positive effects of the added play concept, which helps result in more returning visitors and a better customer experience.
